

CIG-DH

Wall Mounted Anti Ligature Ciglow Flameless Lighter with Control Timer & Automatic Isolating Control Tray

Description

The lighter is made from marine grade stainless steel boasting an anti ligature design. The unit is fitted with an illuminated vandal resistant push button and anti tamper fixing screws as standard. This model is very low maintenance thanks to its unique auto power cut feature which automatically isolates the face plate once it is removed. The new design allows access to the workings of the lighter through a removable faceplate thus leaving the back box permanently secured to the wall.

Mounting Style

This lighter is mounted onto a wall or similar flat surface. This unit requires connection to a mains power supply through a knockout on the rear of the unit.

Weatherproof Rating

This lighter is rated IP65 and is suitable for outdoor use in all weather conditions.

Element

This lighter uses the CIG-SL internally mounted screw-in element.

Operation

This lighter operates a safety control timer. The user presses the push button then releases. The unit then runs through a cycle which heats up the element, switches it off, and then adds in a cool down period. The timer cannot be restarted whilst this cycle is running.

Dimensions

Dimensions: 285 mm (h) x 180 mm (w) x 95 mm (d)

Weight

5 kg
