

CIG-BTK

Battery Powered Wall Mounted Ciglow Flameless Lighter with Control Timer

Description

The lighter has been designed for areas that cannot be powered by mains electricity. It is a stylish slim line design made from powder coated steel and is fitted with an illuminated push button and available with anti tamper fixing screws. The design allows access to the workings of the lighter through a removable faceplate thus leaving the back box permanently secured to the wall.

Mounting Style

This lighter is mounted onto a wall or similar flat surface. The unit is powered by a 12v battery which can be charged by a Ciglow solar cell (CIG-SOL), wind turbine or similar power source.

Weatherproof Rating

This lighter is rated IP55 and is suitable for indoor or outdoor sheltered use.

Element

This lighter uses the CIG-SL internally mounted screw-in element.

Operation

This lighter operates a safety control timer. The user presses the push button then releases. The unit then runs through a cycle which heats up the element, switches it off, and then adds in a cool down period. The timer cannot be restarted whilst this cycle is running.

Dimensions

Dimensions: 255 mm (h) x 90 mm (w) x 80 mm (d)

Weight

4.2 kg (including battery)
