

CIG-TR

Wall Recessed Anti Ligature Ciglow Flameless Lighter with Control Timer

Description

The lighter is a stylish tamperproof design made from marine grade stainless steel. The unit is fitted with an illuminated push button and is available with anti tamper fixing screws. The design allows access to the workings of the lighter through a removable faceplate thus leaving the back box permanently secured in the wall.

Mounting Style

This lighter is mounted flush in to a wall or similar flat surface. Sitting completely flush to the surface, akin to a lift control panel, the unit eliminates protruding edges. This unit requires connection to a mains power supply through the rear of the unit.

Weatherproof Rating

This lighter is rated IP65 and is suitable for outdoor use in all weather conditions.

Element

This lighter uses the CIG-SL internally mounted screw-in element.

Operation

This lighter is available in manual and safety control timer option. The manual user presses the button and holds for as long as it takes to light the cigarette. The control timer user presses the push button then releases. The unit then runs through a cycle which heats up the element, switches it off, and then adds in a cool down period. The timer cannot be restarted whilst this cycle is running.

Dimensions

Back box: 160 mm (h) x 110 mm (w) x 70 mm (d)

Front plate: 190mm (h) x 140mm (w)

Weight

1.5 kg
